

Training Workshop

“Biodiversity conservation actions – The Biodivine Project”

The **BioDiVine** project - *Demonstrating functional biodiversity in viticulture landscapes* is a European LIFE + project, following from a partnership between ADVID and various French and Spanish wine regions. The aim of this project is to implement conservation initiatives such as cover crops, sexual confusion, installing hedges, covering headlands, in order to foster the presence of animal biodiversity. In the Demarcated Douro Region ADVID is responsible for fostering and implementing these conservation initiatives among its Members, which have joined-in quite significantly.

In order to talk more specifically about the successful implementation of these two conservation initiatives, **green covers** and the **installation of native hedges**, next 17th June there will be a Training Workshop on the theme “**Biodiversity conservation initiatives - The Biodivine Project**”.

- **Time and date:** 09:30 - 12:30, June 17
- **Venue:** **Quinta de Castelo Melhor – Duorum Vinhos, S.A.**
National Road EN222, km 216.8, Vila Nova de Foz Côa (lat: 41°02'32,8"N; long:7°04'28"W)
- **Participation costs:**
 - **for the workshop. Free of charge** for members / 75€ for non-members
 - **for the lunch: 20€ + VAT.**

Registration: Registration is **compulsory** and must be completed by June 13

Program

- **Conservation initiatives for preserving functional biodiversity in vineyards - The Biodivine project** | Eng. Cristina Carlos (ADVID);
- **How to implement cover crops and native hedges on a farm** | Eng. João Perry Vidal (Duorum Vinhos, S.A.);
- **The importance of the biodiversity conservation measures implemented at the Quinta de Castelo Melhor** | Dr. Nuno Vilela (Sinergiae).
