

AgriSpin End Conference

Space for Innovation in Agriculture on
the 3rd of July 2017 in Crete

What makes an innovation process move forward?
And what stops it?

Draw inspiration from the AgriSpin results by
attending the End Conference.

Why participate?

During the past two and a half years, 15 partners from 12 EU countries have learned from and with each other in the AgriSpin project about methods for innovation and support services that work.

At the End Conference on the 3rd of July in Crete, the partners of AgriSpin will share their results on:

- Innovation processes – pearls, puzzles and proposals for strengthening the process
- The role of the advisor and the innovation support service
- Tools and methods for stimulating the innovation processes
- Best fit practices of innovation support services
- The Cross Visit method as a way of reflecting on and improving the innovation process

Investigating the Greenacres Joint Programme in Ireland during the Irish Cross Visit

The AgriSpin End Conference is held in connection with the 23rd European Seminar on Extension and Education (ESEE), conducted from July 4-7.

You are cordially invited

The End Conference is a great opportunity for you to get updated on the newest knowledge about innovation processes and innovation support services in agriculture.

The aim of the Conference is to inspire and supply the participants with new knowledge so that they may improve their own innovation support practices.

The End Conference is relevant for:

- advisors working with innovative farmers
- farmers' unions
- innovation support services
- managing authorities
- funding agencies
- companies and organisations that work with innovation in agriculture as well as
- researchers working with innovation processes

About AgriSpin

AgriSpin is a multi-actor project under the European Union's Horizon 2020 research and innovation programme.

The goal of the partners has been to identify and recommend best fit practices for innovation processes and innovation support services.

The innovation cases examined in AgriSpin have all been presented at Cross Visits arranged by the partners. During the Cross Visits, teams composed of colleagues from the partner organisations have interviewed farmers, advisors and other actors in order to better understand what matters most in stimulating innovations.

15 partners in 12 countries

1. SEGES (*lead partner*), Denmark
2. University of Hohenheim, Germany
3. Agricultural University of Athens, Greece
4. ACTA, France
5. CIRAD, France
6. Teagasc, Ireland
7. HAZI, Spain
8. Tuscany Region, Italy
9. LLKC, Latvia
10. VLK, Germany
11. Adept, Romania
12. ProAgria, Finland
13. ZLTO, The Netherlands
14. Innovatiesteunpunt, Belgium
15. IFOAM EU group, EU, Brussels

This project has received funding from the European Union's Horizon 2020 research and innovation program under grant agreement No 652642

Practical information

Attend the End Conference for free.

Participants in the Conference only pay their expenses on travel and accommodation.

The final agenda for the End Conference will be available in April 2017.

Register for the Conference
