

SOCIAL INNOVATORS IN RURAL AREAS

SIMRA FINAL CONFERENCE

“FROM THE IMPLEMENTATION OF LOCAL INITIATIVES
TO THE INTEGRATION INTO PUBLIC POLICIES”

Final
Conference

Brussels

19 February 2020

Venue: University Foundation, rue d'Egmont 11, 1000 Brussels, Belgium

Target audience: European Commission, Members of the European Parliament, regional authorities, NGOs, European networks, researchers, and all those working on social innovation and/or rural areas

Since starting in 2016, the Horizon 2020 project “**Social Innovation in Marginalised Rural Areas**” (SIMRA) has been at the forefront in promoting the contribution of social innovation to social, economic and environmental development in disadvantaged rural areas. The project team has explored vibrant examples of community-led projects - some of which will be presented during this event - to determine triggers and drivers, development patterns, factors of success and evaluation criteria for social innovation in rural areas.

During this final conference, we will present the project’s main findings and discuss their policy implications at all levels (EU, national, regional and local), and with regards to the legislative reforms still in discussion for the next EU programming period 2021-2027.

Our expert speakers will address the following questions: How can the CAP better align with other policies to better support social innovation/innovation ecosystems in rural areas? How do we make synergies between different European funds and programmes to truly support the development of rural areas and communities? What kind of measures offer the most effective support? How can national and regional level policies better support community empowerment?

Interpretation will be provided in: English, French, Spanish

AGENDA

9:00-9:30

Registration and coffee

Moderator: Sarah Watson

9:30-10:30

Opening Session

- Introduction to Social Innovation and to the SIMRA project, **David Miller** (James Hutton Institute, UK)
- Key-note address: “The role of power dynamics in transformative social innovation”, **Flor Avelino** (DRIFT Dutch Research Institute for Transitions, The Netherlands)

10:30-11:30

Session 1 | How is Social Innovation making a change in rural areas?

What is social innovation in rural areas and how does it benefit rural communities and economies? This session will present views from policymakers, researchers and practitioners on the development of social innovation in marginalised rural areas and its impact on local populations.

- “Diversity of social innovations in marginalised rural areas across Europe and around the Mediterranean basin”, **Diana Valero** (University of Highlands and Islands, UK)
